# Team AKMT

CIS 497-Senior Project

Fall 2021

Client: Dr. Sweeney,
USA Professor

Our project is to use the CSET Ransomware readiness assessment in order to assess the overall cybersecurity and network security within a business or organization. CSET is a software that was developed under the direction of the Department of Homeland Security to manage the risk to technological infrastructure. This software will allow us to determine if the appropriate network security guidelines are being utilized for the best possible security outcomes. Our goals for this project is to learn the CSET software, perform a security analysis of a network, and provide information on improving the networks overall cybersecurity.

Adam Hoang
Information Systems

"I enjoy working with computers in ways such as assembling, troubleshooting, or just playing games on them. In the rare case that I decide I want to be outside and active, tennis is my favorite sport to play."

Meshierra Austin
Information Systems

"I enjoy spending time with family and friends. I also enjoy going to new restaurants and trying different foods. I am currently an intern at the Mobile County Commisions "

Kameron Patrick
Information Systems

" I am the middle child of three boys. My interests consists of sports, reading, and being active. My career plan is to become a system admin. "

Timothy Simmons
Computer Science

"I have an interest in product management. Which is basically the what why and how a product is going to be made. In my free time I enjoy working out."
